Technical Skills

Programming Languages: **JavaScript**, **Typescript**, **JQuery**, **SQL**, **Python**
Technologies: **MERN Stack (MongoDB, Express.js, React 18, NodeJS)**, **Vue 3, mySQL, Jest, Flask, Django, APIs, Sass, Mongoose, WebPack, Vite, GraphQL, PWAs, Axios, Puppeteer, Cheerio, Next.js, Remix, EmailJS, Bcrypt**

Technical Projects

PollR - *MERN Stack Web Application*
- Led a team to design and deploy a web application hosted on **Render**, allowing users to create and vote on polls in real time
- Facilitated storage with **MongoDB Atlas**, user authorization with **JSON Web Tokens,** and all database operations performed through **GraphQL**

Doképex - *Front End Web Application*
- Utilized **Vue** framework to solo deploy a web application hosted on **Netlify**, paying homage to a beloved franchise
- Integrated rich **Audio** elements, and built using responsive **Mobile-First Design** principles
- Enlisted complex open **PokéAPI** for raw data and **LocalStorage** caching to eliminate latency

Bookshelf - *Full Stack Web Application*
- Led a team to design and deploy a web application hosted on **Heroku**, allowing users to create and store book collections
- Frameworked with Model-View-Controller (**MVC**) paradigm, using **Handlebars** as a templating engine, and users are securely hashed with **bcrypt** and managed through **Sequelize** as Object Relational Mapper (**ORM)**
- Enlisted OpenLibrary **APIs** to populate homepage and provide dynamic search functionality

jbassard97nodecolors - *npm module*
- Published **npm** module that allows users to creatively color and style **CLI** text outputs
- Downloaded **500+** times over its lifetime

Education

Certificate (September 2023 - March 2024)
    Full Stack Coding Bootcamp at University of North Carolina at Chapel Hill

Employment History

Assistant General Manager, Marco's Pizza (September 2022 - Present)
- Mediated positive relationships between upper management, the team, and guests through Customer Service
- Represented the General Manager at every level of store operation including interviewing, hiring, scheduling, accounting, and all other essential functions
- Created multiple **Front-Facing** web applications to streamline daily processes including inventory and scheduling, and subsequently improved overall performance and communication within team
